CERTIFICATION

Full-Stack Web Development

Institute: Error Makes Clever
Status: Ongoing

SOFT SKILLS

Teamwork: collaborative in achieving goals.
Adaptability: Quickly adjusts and thrives in dynamic environments.

PROFILE

Aspiring full-stack MERN developer and fresher with experience in building responsive, user-friendly applications. Proficient in front-end development with HTML, CSS, JavaScript, ReactJS, and back-end development with Node.js, Express.js, and MongoDB. Passionate about technology and eager to learn

PROJECT

Project - 1

Bulk Mail App

(React, Node.js, MongoDB, Express.js)

Overview: Developed a full-stack application for bulk email sending with a user-friendly interface and cloud-based storage.

Front End: Created using React and Tailwind CSS for responsive design. Integrated an XLSX reader for parsing email addresses from Excel files.

Back End: Implemented with Node.js and Express.js, using Mongoose for data modeling and MongoDB Atlas for cloud storage.

Key Features: Includes bulk email sending, Excel file upload and parsing, and real-time email delivery status updates.

Project - 2

Nostra E-Commerce

(HTML, CSS, JavaScript)

Overview: Developed a responsive e-commerce site "Nostra E-Commerce" using HTML, Tailwind CSS, and JavaScript.

Key Features:

Advanced Search: Enabled keyword-based product discovery.

Checkbox: Filters: Refined product searches by categories.

Responsiveness: Ensured cross-browser compatibility and mobile optimization.
